

# “Data” to Karma by Taylor Swift

A handwritten signature in blue ink that reads "Data". The letters are stylized and cursive, with the 'D' and 'a' being particularly prominent.

I told her to sit then she took a shit  
Excited now she is able It's so evident  
She wants me to be... around  
Out of my chair Got some fresh air  
I like getting the tangles out of her hair  
She'll never sit down

But she will always bark with what she needs  
As honest as she could be

Cause Data never pretend  
Data is a friend  
Data is that voice in the air  
You hear again  
Data will never be bought  
I am so happy that  
Data, it's not, about the money  
Data barks at cats, never in combat  
Sleeps on her mat  
Barking like a Goddamn diplomat  
Me and Data have a pact

China Boy, she says to me  
My whole world is about simplicity  
You can learn.... from my needs  
Bark just once, Bark just twice  
know she's telling me  
who is really nice  
and should be... around

and she will always bark with what she means  
As honest as she could be

Cause Data never pretend  
Data is a friend  
Data is that voice in the air  
You hear again  
Data will never be bought  
I am so happy that  
Data, it's not, about the money  
Data barks at cats, never in combat  
Sleeps on her mat  
Barking like a Goddamn diplomat  
Me and Data have a pact

Ask me what she learned  
From her ten years  
Ask me what I learned from all my peers  
Ask me why so many tears  
There is still fear  
Cause love can't be a blunder  
Makes me wonder  
Data's on your scent  
Like a caring sister

Data's going to track you down  
From Bayside to Chinatown  
Can be trusted, Data is a Queen  
Data knows all my friends  
and family  
Data took my tears to the sea  
Her heart is light and free

Cause Data never pretend  
Data is a friend  
Data is that voice in the air  
You hear again  
Data will never be bought  
I am so happy that  
Data, it's not, about the money  
Data barks at cats, never in combat  
Sleeps on her mat  
Barking like a Goddamn diplomat  
Me and Data have a pact

Data never pretend  
Data is a friend  
I will love you till the end
