

“If It’s Love”

Will never tell you that I have all the answers

But with you I will always take my chances

If it's love. Signs from above

Can you see that I am no longer in shadows?

Can you listen to my songs that I may be wrong about love?

I'm thinking of

Is it signs from above? is it luck?

what will become if is love. That fits like a glove

I hope that my love

will be enough

Just want you to be sure and secure

I know that the world can be so cruel

No one wants to be a fool.

Everyone wants to be that jewel

My life is your shelter. Hope we'll be together.

Just want you to feel safe and be Better

To be young and be cool and have no real-life tools

As you get older you hope you're wiser and life gets simpler

Happiness should be closer. Hope time will never be over

If it's Love

*Will never tell you that I have all the answers
But with you I will always take my chances
If it's love. Signs from above
Can you see that I am no longer in shadows?
Can you listen to my songs that I may be wrong about love?
I'm thinking of*

*Is it signs from above? is it luck?
what will become if is love. That fits like a glove
I hope that my love will be enough
Just want you to feel sure and secure*

*I know that the world can be so cruel
No one wants to be a fool. Everyone wants to be that jewel*

*I will never have all the answers but will know what matters
If it's Love*

*No one can see today what we won't see until tomorrow?
Will take my chances no matter circumstances just want to feel whole
Finally see sunlight when before only saw clouds and many shadows
Now I know why they say hearts have windows
If it's Love*

*Just want you to feel safe and secure
Just want you to feel sure and be better*

*I will never tell you that I have all the answers
My life is your shelter. Hope we'll be together.*

*Know we can get thru any weather
Afraid of heights but still want to climb up that ladder
Will never have all the answers but know what really Matters
My heart you can enter. I will always surrender. If It's Love*
