

## “Destiny”

Thinking of you keeps me awake

Dreaming of you keeps me asleep

Right next to you gives me that drive

Being with you just keeps me alive

Questioning my legacy

Listening to melodies

To get me serenity

Wish for perfect Chemistry

I know sometimes the world can be so unkind

Not to worry because our stars are aligned

Thinking of you I don't even need to try

Our love will be how this story will survive

Many ways, lives have already been designed

so, if we don't listen, we will fall behind

Faith is greater than our body and mind

Your words are therapy

Your laughter is my remedy

Gave me nothing but clarity

In this world you are life to me

I always believed in destiny

You don't need to always say yes to Me

No need to choose your words carefully

Love will be our legacy

Always believed in destiny

Took my time to write this song

Simple words that's never wrong

To tell you where I belong

Right next to you since you were born

Questioning my legacy

Listening to melodies

To get me serenity

Hope for perfect Chemistry

I know sometimes the world can be so unkind

Not to worry because our stars are aligned

Thinking of you I don't even need to try

Our love will be how this story will survive

Many ways, world has already been designed

so, if we don't listen, we will fall behind

Faith is greater than our body and mind

Your words are therapy

Your laughter is my remedy

Gave me nothing but clarity

In this world you're life to me

I always believed in destiny

You don't have to be on the cover of magazines

You don't need to agree with me

No more living carelessly

Always believed in destiny

You don't need to always say yes to Me

No need to choose your words carefully

Love will be our legacy

Always believed in You and Me

You don't have to be on the cover of magazines

You don't need to agree with me

No more living carelessly

Always believed in Destiny
