

“Before I Sleep”

Intro

I need your words on my phone
before I go to sleep

Too many times I wear my
emotions on my sleeves

Try and recap the day
but not to think too deep

Thinking of the past
there are times I just weep

Hope someday you will take
my tears to the sea

Until then will continue
by just counting sheep

Doing what's best for my son
hoping happiness will not be far

Chorus

I will always pray
for friends and family

Wishing only the best
for those that's in need

Dream one day our hearts will
be light and free

I know now
This world can't be just me

I will always pray
for friends and family

Wishing only the best
for those that's in need

Until then will continue
by just counting sheep
right before I sleep

2nd Verse

Your perfection and great smile
trapped behind my gaze

Your beautiful brown eyes see
this world differently

Your flowing black hair entwined
hold your talents bright

All of your histories

seeing the light

These eyes have only one mind

set upon us two

My present, past and the future reside with you

Hoping this scene will never fade

The truth and its meaning will remain

2nd Chorus

The sky is bright and blue

as I wait for you

The fire that's in my heart

burning bright and true

Sixteen miles is the distance

between me and you

The sky's now dark

the world can be so cruel

The bright moon light guides me

pass the morning dew

The vision of you and

your shadow coming through

I will continue this dream

by just counting sheep

right before I sleep

Final Chorus

I will always pray
for friends and family

Wishing only the best
for those that's in need

Try and recap the day
but not to think too deep

I now know
This world can't be just me

The bright moon light guides me
pass the morning dew

The vision of you and
your shadow coming through

I will continue this dream
by just counting sheep
right before I sleep
