

“With You”

I want to take my time with this

So, you can understand what you mean to me

Felt betrayed and I could not breathe

Pain was harsh that brought me to my knees

You talk to me when no one did

Gave me time, when my life was not worth a dime

And you nurse me back

You gave me reasons to just move ahead

You gave me a song that say the best is yet to come

You reminded me to be proud of where I came from

Your timing is perfect, gave me time to reflect

You are so direct and for that there's nothing but respect

With you, the sun shines brighter when I just hear your voice

With you, the clouds are symbols of all my choices

With you, the wind blows and tells me to dream again

With you, the sound of the rain just took away my pain

With You I Can Move Mountains
