

Time Flies (Graduation Song)

Chorus

Remember the time when you came into my life.

You gave me this drive, everything seems like Divine Design

Is just so true with what they say - cherish the time with your child cause,

TIME FLIES.

Verse #1

Be proud with what you have accomplished

Understood what it took to be more

without knowing what will be in store

To learn everyday

that your college years are to see and explore

you asked, "what was the point of this course?"

The point will always be that your life will have many doors

Find the path to open each one and be better than before

Learn what defines you and attempt to make it to the top floor

That journey is what life is about. Without doubt,

the fun is in the route

Pre-Chorus

Remember the time when you took your first little steps.

Always wondering what you should be doing next

Life is complex, full of reps with school projects

But now you are done, and a new chapter begins

Chorus

Remember the time when you came into my life.

You gave me this drive, everything seems like Divine Design

Is just so true with what they say - cherish the time with your child cause,

TIME FLIES.

Verse #2

So proud of the person you have become

to not judge someone because of income

to never waver to the pendulum and where it has swung

to understand and respect who you are and where you are from

Taking negatives and making them into strengths.

This Journey is what life is truly about

Without doubt, the fun is in the route

Pre-Chorus

Remember the time when you took your first little steps.

Always wondering what you should be doing next

Life is complex, full of reps with school projects

But now you are done, and a new chapter begins

Chorus

Remember the time when you came into my life.

You gave me this drive, everything seems like Divine Design

Is just so true with what they say - cherish the time with your child cause,

TIME FLIES.

Bridge

Knowing is not enough. We must apply, be willing and just do

Future is for those who believe in their dreams

To live and not treat like is routines.

Pre-Chorus

Remember the time when you took your first little steps.

Always wondering what you should be doing next

Life is complex, full of reps with school projects

But now you are done, and a new chapter begins

Chorus

Remember the time when you came into my life.

You gave me this drive, everything seems like Divine Design

Is just so true with what they say - cherish the time with your child cause,

Time Flies.
